NEW YORK STOCKS VERY STEADY HEAVIER RECEIPTS WITH ACTIVITY CONFINED TO A FEW ISSUES.

NEW YORK, Feb. 3 .- 2 p. m.-The TODAY'S PRICES ON dullness continued into the last hour with price changes unimportant and fa

evidence of considerable firmness, and Trade.) undoubtedly the Harriman following would like nothing better than a steady, firm, but inactive market, pending the settlement of a number of problems now interesting Wall Street. The Harriman hearings, the investigation by the Senate of the Tennessee Coal and Iron purchase by the United States Steel Corporation, and the outcome of the commodity clause" matter before the Supreme Court of the United States.

Any one of these things is liable to start a surprise party that the Street would not like to have develop, Mr. Morgan has taken his departure to the other side to sell Erie bonds. Mr. Morgan is usually successful, but he has travagance is setting a fearful pace. The public is absolutely out of the stock market, out for good. World-wide waste and extravagance has not been checked. Following in the wake of the panic, extravagance is setting a feaful pace. The United States is facing a \$175,000,000 deficit, and yet every member of Congress looks to the interest of his constituents, and the demand for fodder from the public crib was never more disgusting. Antique claims are being paid daily, and the spirit of conservation of resources is advocated at one end of the Avenue and unlimited expenses advocated by practically everyone but Chairman Tawney at the other. It doesn't look like a good time to bull stocks, with prices grinding on the highest levels of the year, fully discounting all improvement, many times over, while improvement is delayed. and extravagance has not been checked.

Not a Room Traders' Market. And yet it is not a market that offers much encouragement to the professional son, Baltimore and Ohio, Brooklyn Rapid Transit, Erie, Denver and Rio Grande, Southern Pacific, St. Paul, Great Northern, Union Pacific, and Illinois Central did not fluctuate more than a fraction or two, remaining unusually dull but without material change in values. New York Central started higher, but it came back to a dull steady movement. Smelter and Steels and many industrials displayed the same inanimate action. Northern Pacific moved up 5%, Missouri Pacific 4 to 71, and Louisville and Nashville a point, but this stock has not been in the active list for some time.

In the industrial list Copper and Smelter were strong, the former at 5% and the latter at a point advance. Consolidated Gas on the loss of the deposits of consumer's funds over 80 cents since the original decision drouped 4. The

of consumer's funds over 80 cents since the original decision, dropped %. The Steels were in the inactive list. While there was nothing to indicate bearish tendencies, the market has demonstrated that it must move one way or the other. It can not stand still.

This continued dullness continued ternoon. At that time most of the ar-ternoon. At that time most of the gains other than in Chesapeake and Ohio, Copper and Smelting, had been lost. A study of the blackboard showed Chesapeake and Ohlo was 66, a rise of

124, and it was the active leader of the list. Canadian Facific was % higher and Nipper a little firmer.

They remember the ardent wooers of their Chi cago days, and they are determined to have the right brand. Hence the Rosebud swains are in desperation and for days have been writing to Chicago for

Rumor Tells of Disagreement Before Broker Closed Business Office.

CHICAGO, Feb. 3.-The Chicago Tribune and the New York Journal tothese bonds are sure to rise in popular favor, as the security is ample; the income of the company assured, and at a sum far in excess of the fixed charges, interest and at a coming to light. Bank stocks seem to be somewhat ne-flected these days, while conditions are gentlemanly characterization of the lowly readjusting themselves after the transaction) in the history of speculation in this country. When the announcement was made that Sidney C. Love was going out of business it was stated he had made

enough money to live on, that he was tired of business, and that he intended to devote his life to travel and all the pleasures the world holds out to good ellows who know how to enjoy life. This little narrative was received with ynical uplifting of eyebrows by perons who had ground floor knowledge of Mr. Love's high flying career of the House Committee Member the public increased the further statement was riade that W. H. Moore, familiarly known as "Judge" Moore, of Diamond Match fame, had come to the rescue of his old friend and protego Sidney, and had advanced \$2,000,000, to

Love, Mr. Moore was painted as a full-A porter employed by the House Ap-Mr. Moore was painted as a full-fiedged philanthropist, the portrait being surmounted with a halo of self-denying friendship. Mr. Moore was credited also with a commendable desire to aid the financial and commercial situation in Wall Street and in Chicago by preventing any disagreeable ripple on the surface.

But Mr. Moore was shy about \$2.500. propriations Committee removed from a looking glass in the committee room today two numerals and replaced them They were pasted on the glass, and

as the porter stepped away the red figures brought forth a shout of glee from several members of the committee. To the ordinary observer, the figures meant nothing. To the members of the Appropriations Committee they mean everything—they mean a resumption of the life that was agreeable and worth living. The figures put up today were "28." Not significant? It is not the twenty-eight day of the month. No. Well, the "28" means that there are but twenty-eight days remaining of the Roosevelt Administration.

For several days now the porter has faithfully put new figures on the glass each morning, and as the numbers diminish the glee of the committee mem—

by preventing any disagreeable ripple on the surface.

But Mr. Moore was shy about \$2,500,-000 through Mr. Love's inability to guess right on any speculative proposition under the sun. Whether Mr. Moore will endeavor to recoup himself or whether he will set the machinery of the law in operation is an open question at the present moment. Mr. Moore might possibly get back \$1,000,000, but the chances are so remote that it is hardly likely that he will attempt.

It is estimated that light began to dawn about the time of the last Chicago with Mr. and Mrs. Reggle Vanderbilt, and some other Eastern people. Love had cut into the Vanderbilt set, had a cottage at Newport, and maintained a house in New York that must have cost him from \$65,000 to \$75,000 a year to run. as the porter stepped away the red fig-

run.

One man said today somebody in Love's office tipped off to Moore the fact that he was mistaken as to the amount of securities in Mr. Love's strong box. This man is a former employe of the Love firm, and he commented sadly and cynically on a lost opportunity.

"Six years ago," said he, "I could have told Mr. Moore how thoroughly in error. bix years ago," said he, "I could have told Mr. Moore how thoroughly in error he was. But I did not. Now some other fellow tips it off to Moore, probably gets a good price for his information and now the office is shut and I'm out on the street without a job."

Another man, however, felt sure that Mr. Moore himself had discovered his error.

It says each morn, as writ in red or blue,
"You'll soon be through with him—and he with you,"
And though the minutes seem like dragging days,
Each nears—oh, sweetest thought—the parting ways.

Each nears—oh, sweetest thought—the like dragging days, says.

Mr. Moore inquired earnestly whether from similar delusions, whether ther were any other customers of Mr. Lov who were mistaken as to the amount of again."
But softly murmur as we give our ribs who were mistaken as to the amount of securities belonging to them in the Love strong box. He was assured he was the only victim of such a lamentable mathematical error. All the other big patrons of the firms had faded away in the last few months.

It can be stated that Mr. Love's financial status is like that of a flat fire, His wife, who was Miss Marjorie Burnes is not an eight time millionaire, as a prod,

The Safest Investments Are those that do not fluctuate during dis-turbed conditions of the money or stock mar-kets. First deed of trust notes (first mortkets. First deed of trust notes (first mort-\$3ges), well secured on real estate in the Disthict of Columbia, constitute "gilt edge" investments. They do not depend upon the financial responsibility of individuals or cor-porations for their stability and are exempt from taxation as personal property. We can supply such investments in amounts from \$50e upward. Send for booklet "Concerning Leans and Investments."
